

## HEADLICE REMOVAL SYSTEM

Designed a device which is under **patented rights** that is a cost-effective head lice treatment. This device reduces treatment time to 20 minutes, achieving a 95% success rate in experimental research.

Optimized design parameters, ensuring safe and efficient application. The device is a one-time solution. Skills: Research, user-centered design, Risk-mitigating, safety control, product development, CAD.

Here is the link to our project which is being developed by the company that used our prototype:
